

Shield Shed Felt Mineral - Premium

Use

Single layer bitumen felt for the roofs of non-habitable structures with a pitch at or above 20 degrees. Typically apex or pent garden sheds, kennels, and hutches.

Product Information

SHIELD Premium Shed Felt has a polyester fibre as the core ingredient, rather than glass fibre. This significantly increases both tear and wear resistance as well as life expectancy of up to 15 years. (The mineral finish protects the bitumen from UV damage, and is coloured to create a pleasant finish).

Performance & Standard Composition

Composition:	Bitumen
Form:	Roll
Finish:	Mineral - Green / Black
Length:	20m
Width:	1m
Roll Weight:	40kg
Carrier:	Polyester

Installation

MATERIAL HANDLING

Handling: Material should be unloaded and handled with care to avoid damages.

Site Storage: Material should be stored on end on a firm, level clean base protected from direct sunlight.

PRIOR TO COMMENCEMENT

Application must always follow good, safe working practice. Prior to commencing works it is advisable to assess the work area, irrespective of levels of competence, ensuring all works are being planned and undertaken in a safe, pragmatic manner. Temperature should be considered, with works being undertaken ideally at temperatures over 10 C. Avoid installing in wet or very cold weather.

PREPARATION

Before starting on the roofing works, the installer should ensure the surfaces receiving the Shield Shed Felt are sound, clean and dry. All existing old roof felt should be removed, and the roof structure should be checked for adequacy and strength prior to new work being done.

DURABILITY

Life expectancy of this product is up to 15 years when installed as per manufacturers guidelines.
